

ProfilGate[®] - Hygiene Component
for Trolleys and People in the Food Industry

The Problem

Uncertain transitions cause the risk of ingress of foreign matter

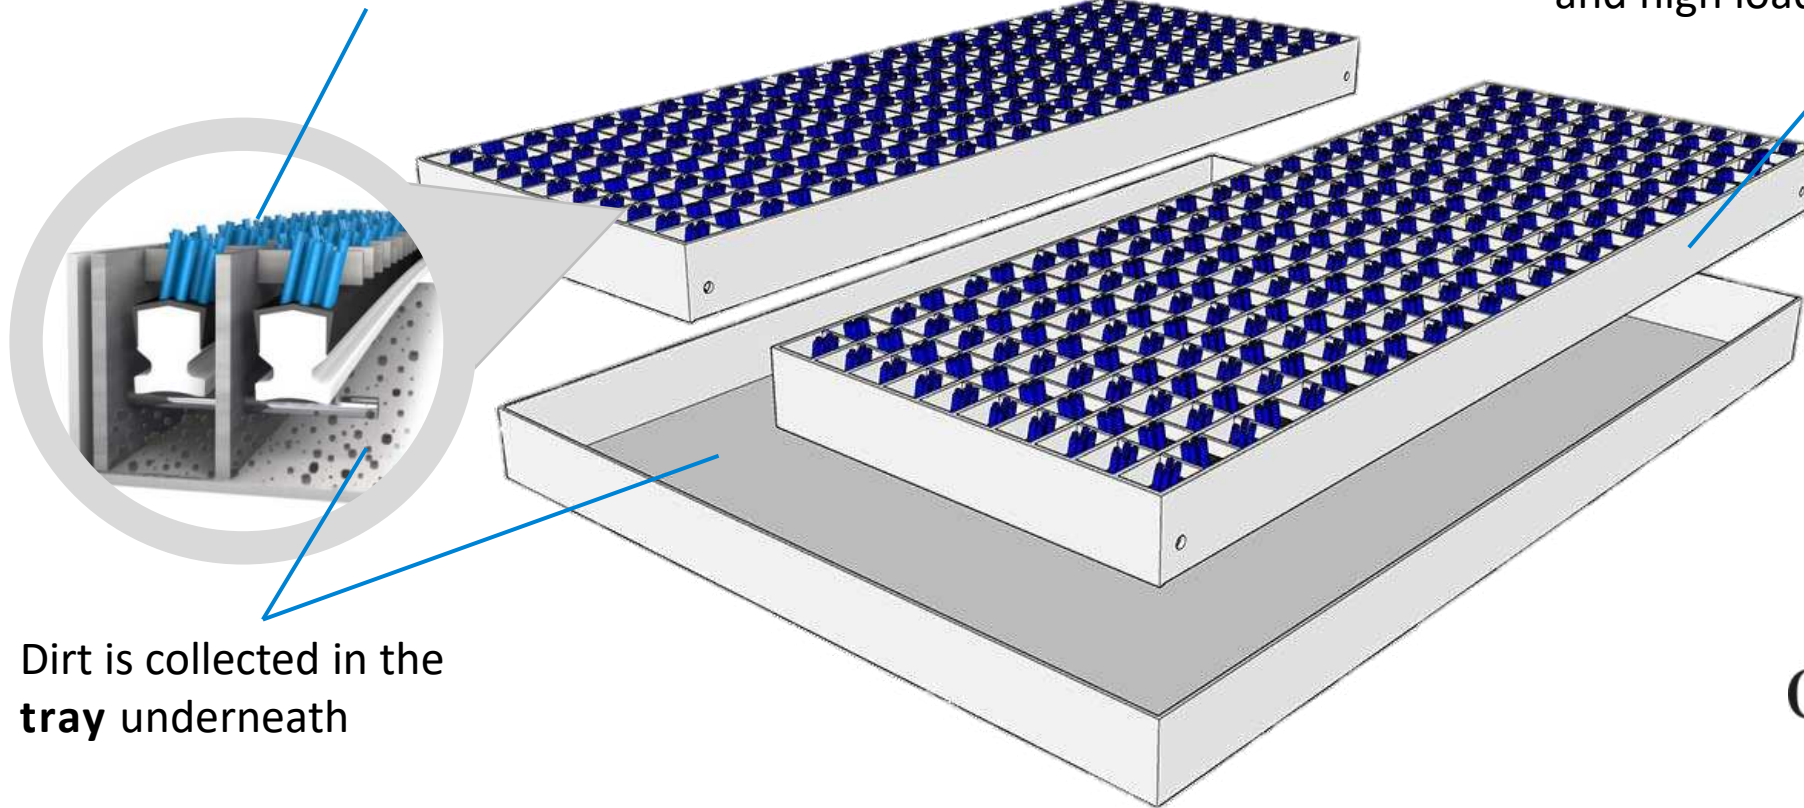

The Solution: ProfilGate®

The Components of the System

Brush strips with diagonally arranged **bristles** of different lengths

The **grating** provides stability and high load-bearing capacity

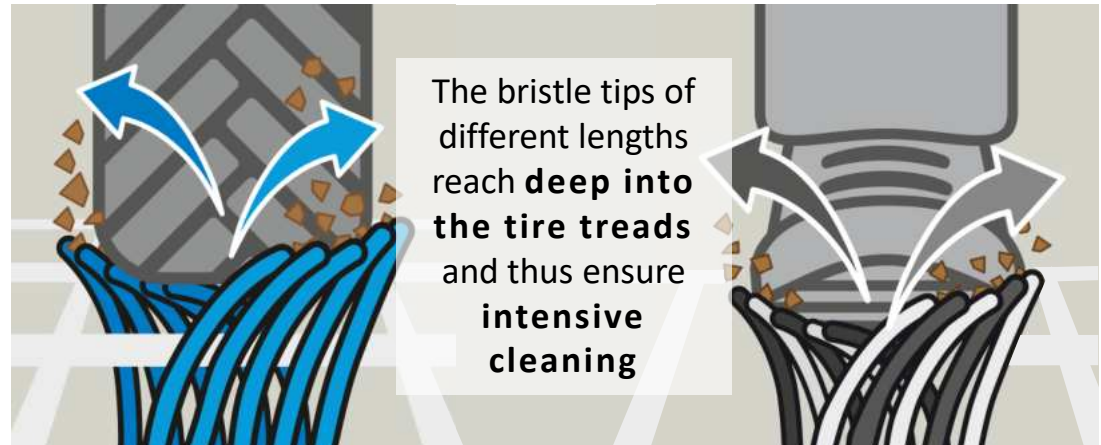

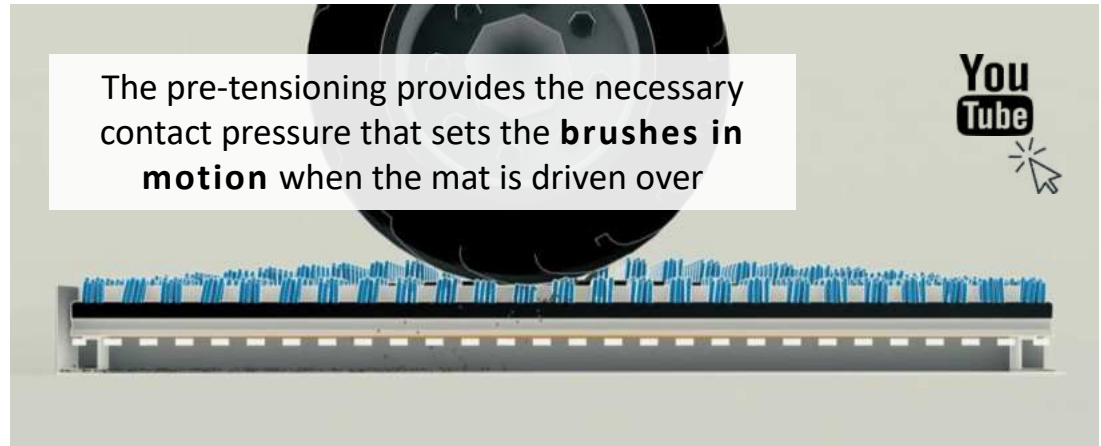

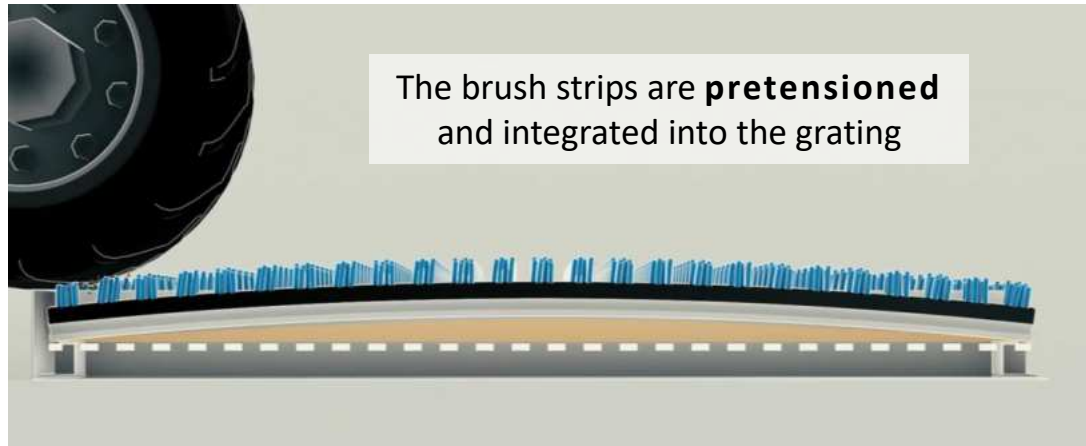

Dirt is collected in the **tray** underneath

Quality
made in
GERMANY

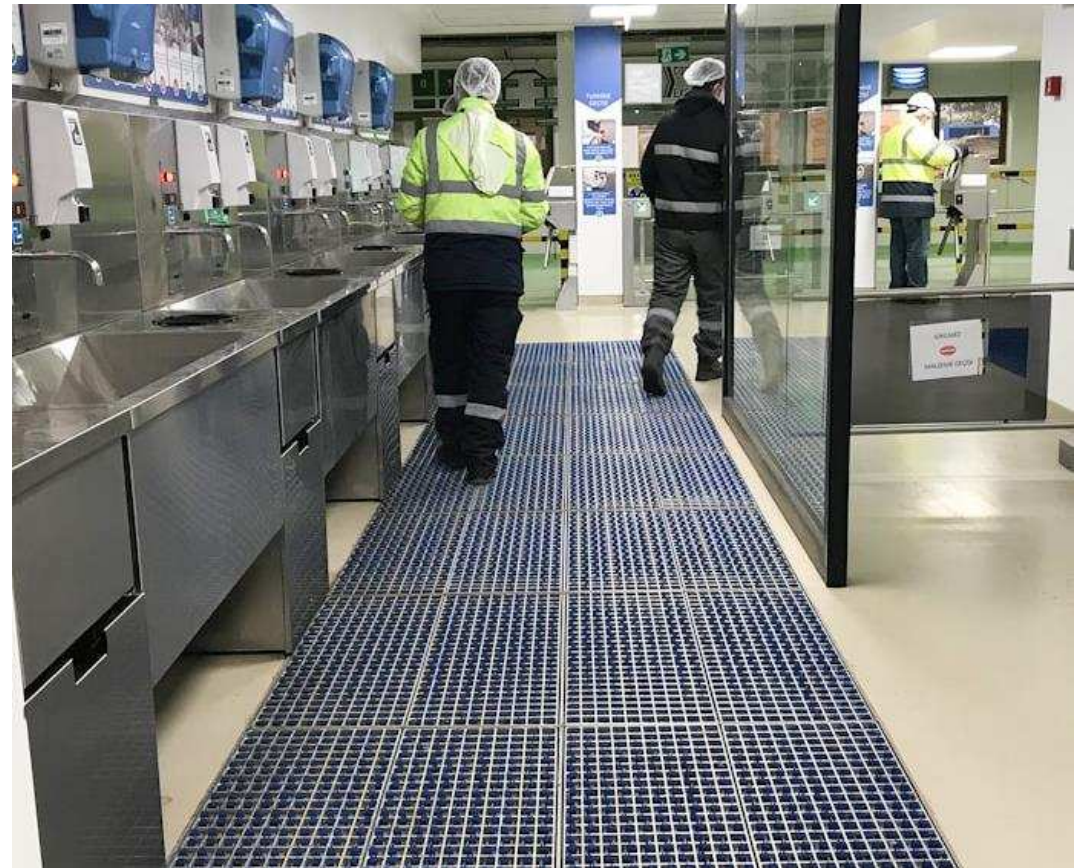

The Function

Typical Applications – Staff Hygiene

Ferrero, Trabzon (TR)

Nestlé, Karacabey (TR)

Typical Applications – Industrial Trucks Hygiene

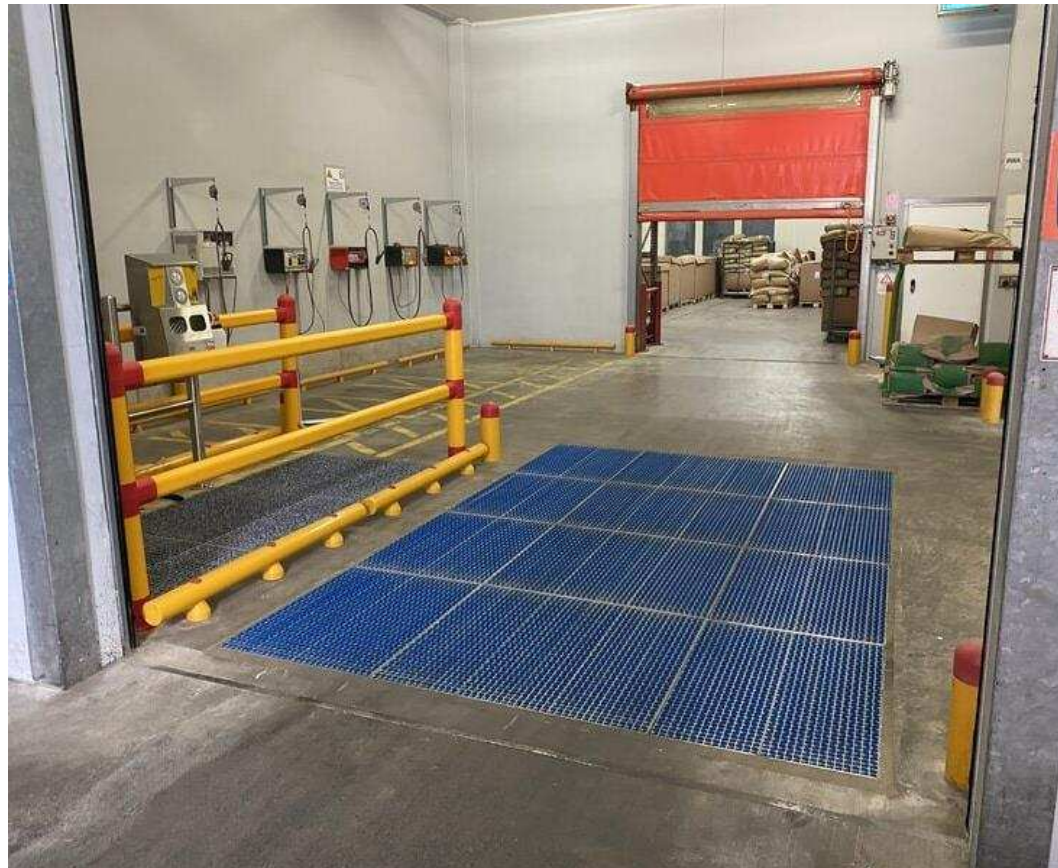

Buss Fertigerichte, Ottersberg (D)

Genesis Kitchen, Solingen (D)

Typical Applications – Combination for Holistic Hygiene

Kräuter Mix, Abtswind (D)

Pfeifer & Langen, Jülich (D)

Easy Grate Lifting and Cleaning

Effectiveness – Comparison Before/After

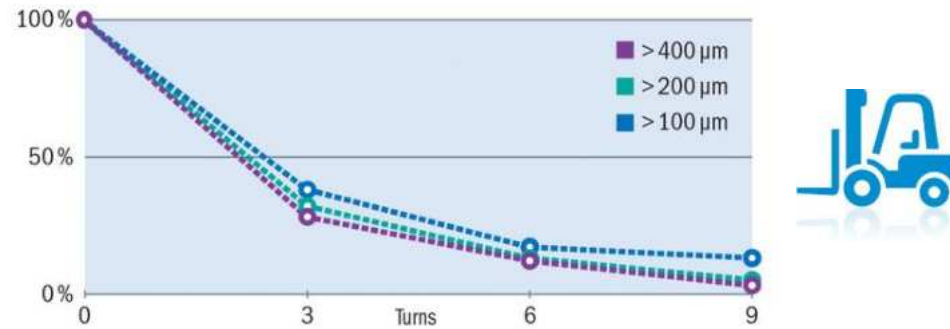

Lindt & Sprüngli, Aachen (D)

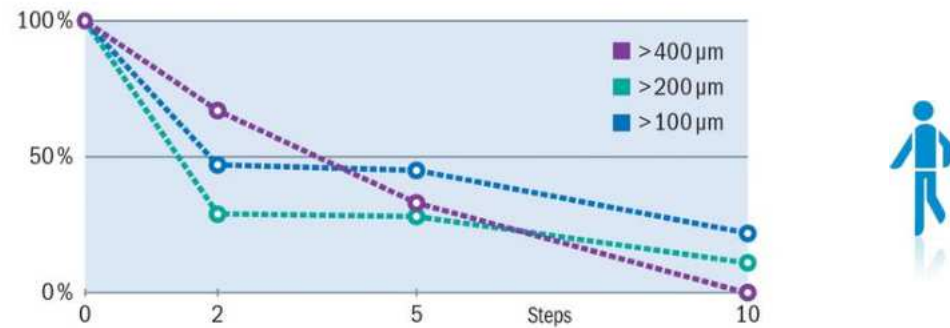

Effectiveness – Scientifically Proven

Fraunhofer IPA test results for forklift truck tires

For a sound cleaning of forklift-tires we recommend at least 3 rotations.

Fraunhofer IPA test results for shoe-soles

Only a few steps on the ProfilGate® system are enough to brush off more than 60% of the adhering dirt.

 **Fraunhofer**
IPA

After only 3 rotations, up to **80%** of the **dirt** adhering to smaller tires and wheels is already **removed**.

Product Safety – Certifications

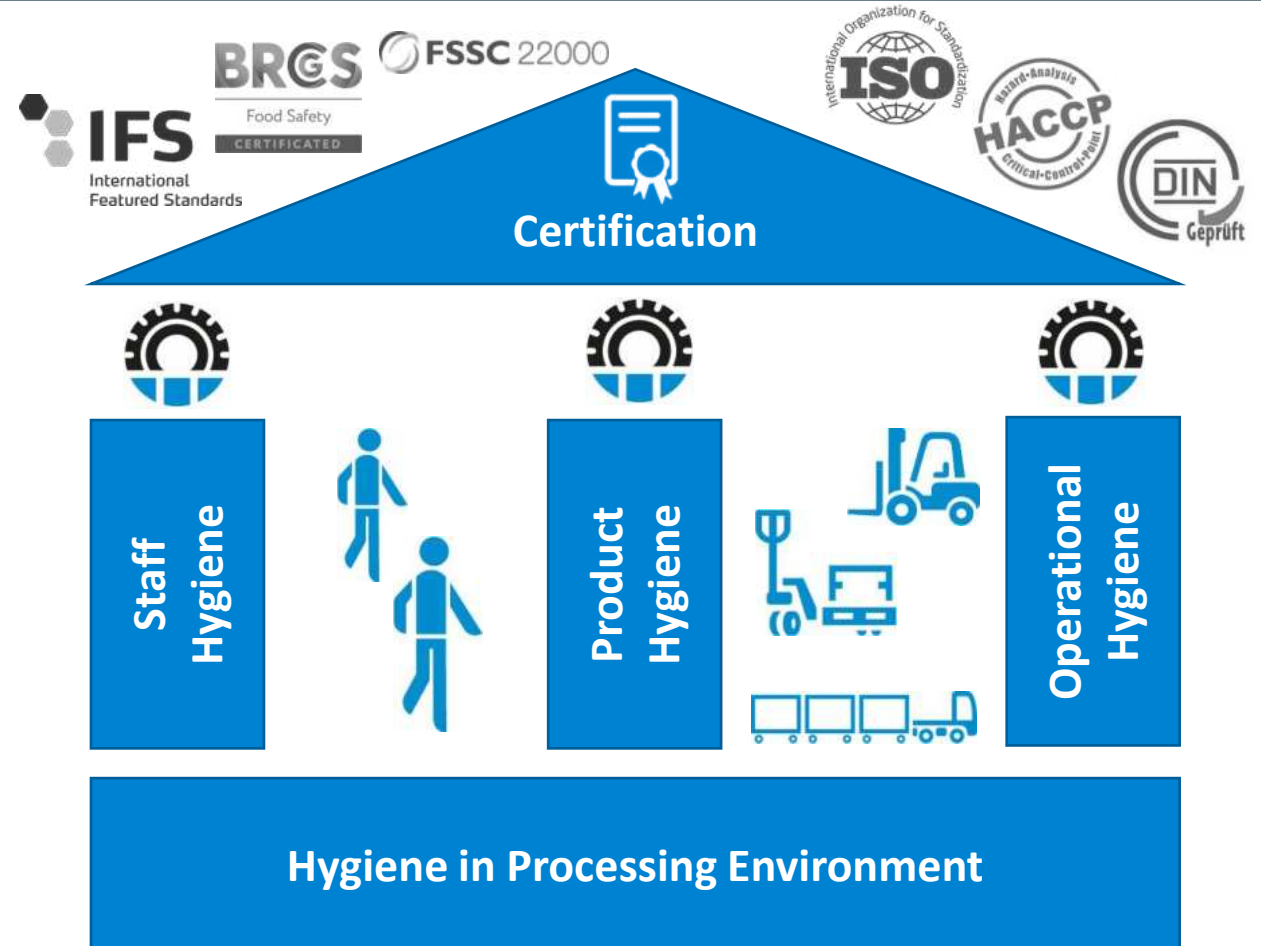

Strict **quality** and **product safety** standards

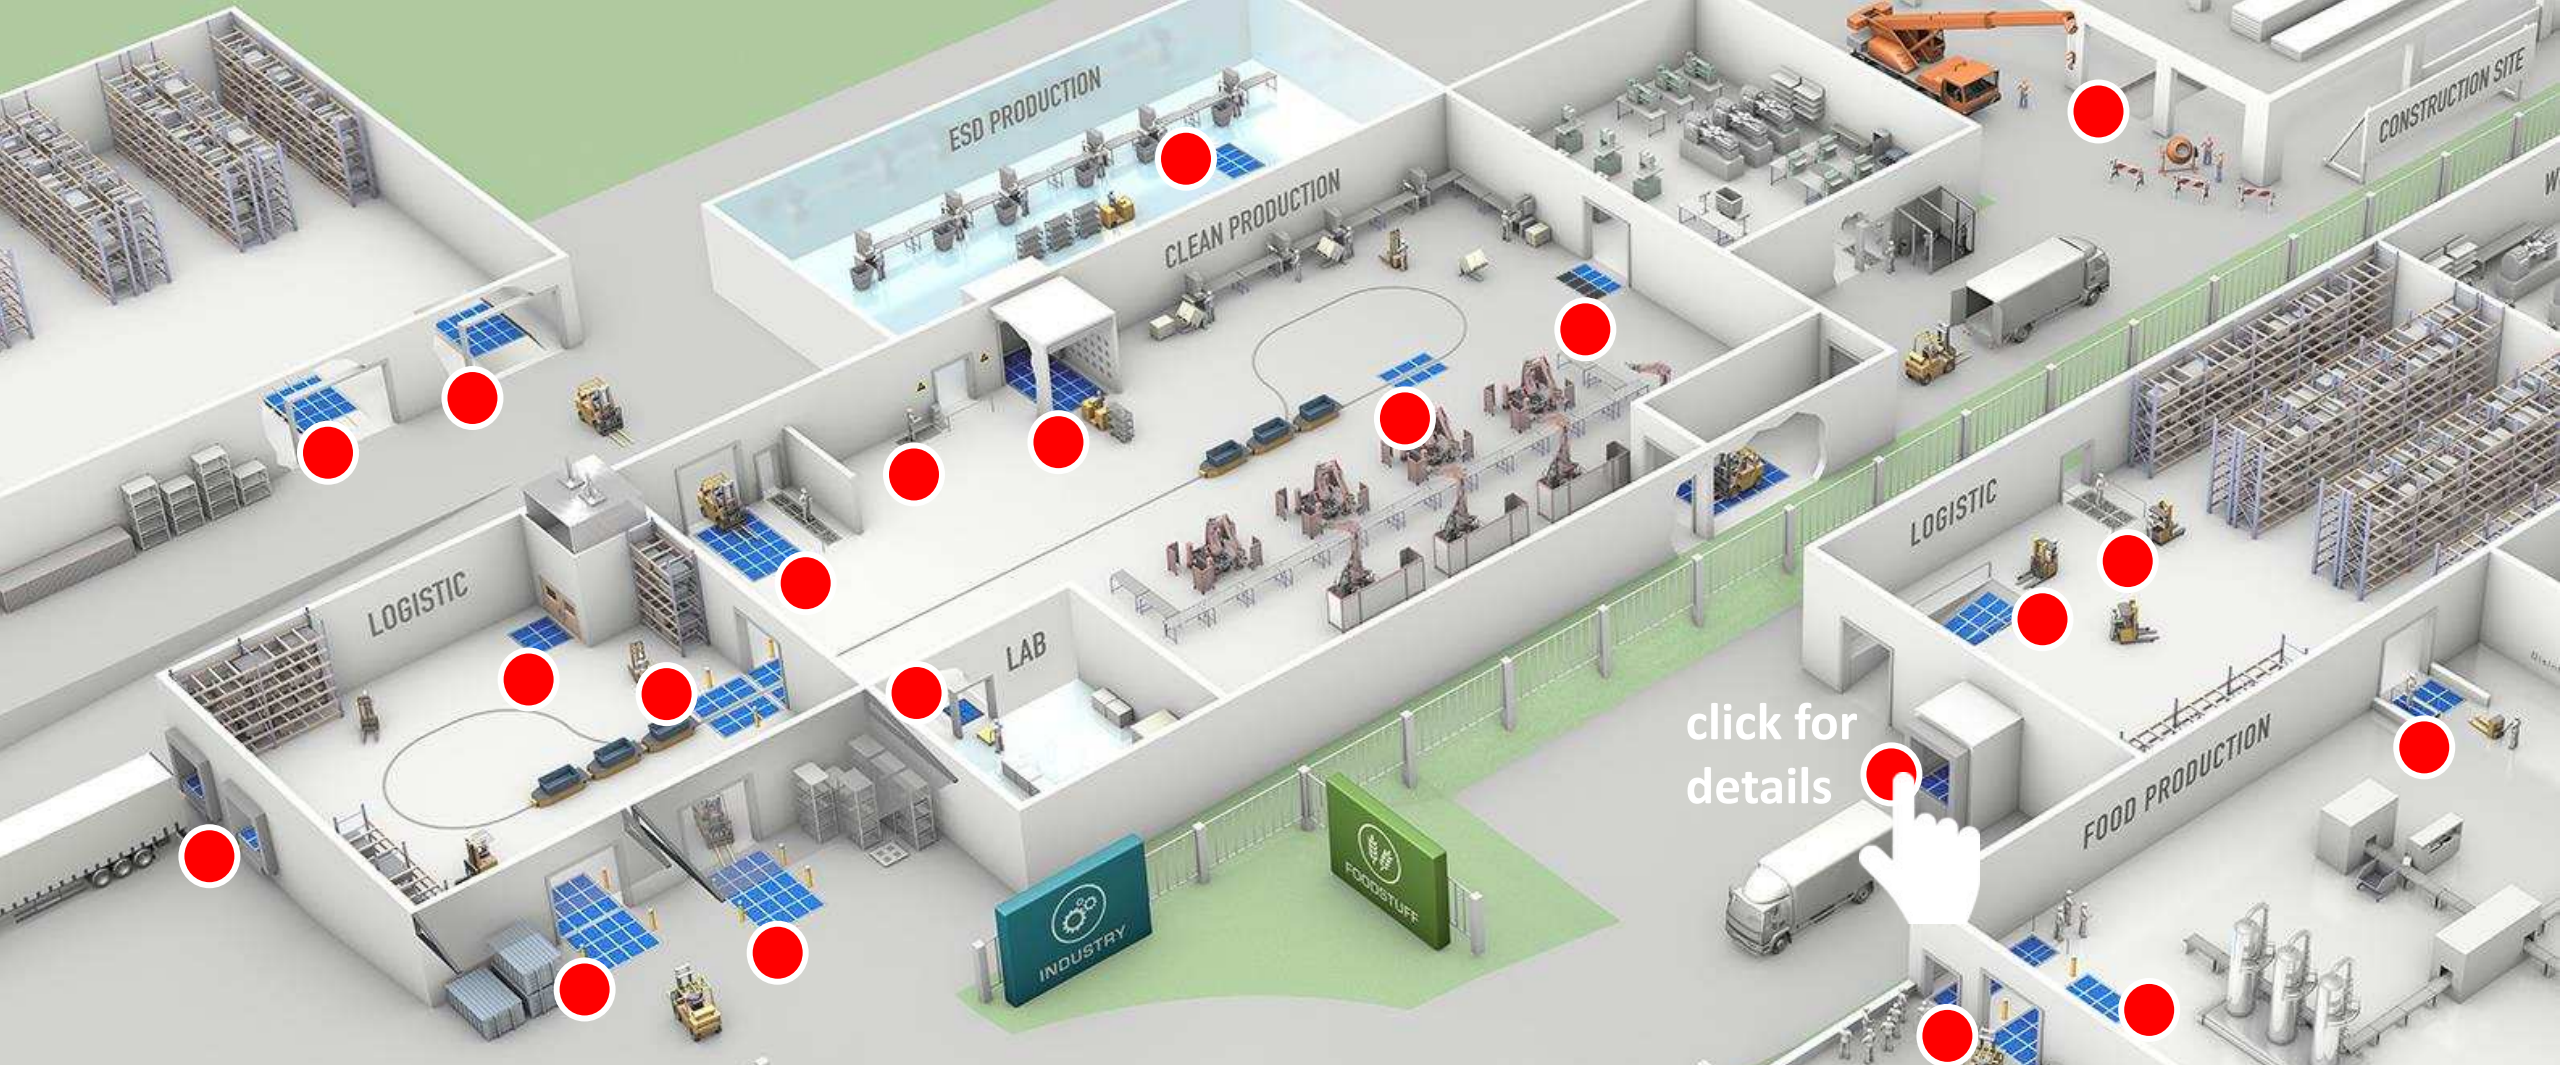

Target is to **protect** hygienic areas **from contamination** and to **provide bio-security**

ProfilGate® is the missing link to maximize **process reliability**
